**Announcement of suspension of purchase file 38-2020 in the procurement process of a
CRO contract**

ISGlobal, in the context of the ANTICOV Clinical Trial that will be performed in Mozambique, opened a public process for the procurement of a Contract Research Organization (CRO) company to provide appropriate monitoring services on the ANTICOV (An open-label, multicenter, randomized, adaptive platform trial of the safety and efficacy of several therapies, including antiviral therapies, versus control in mild / moderate cases of COVID-19) project.

After analyzing all the proposals received and exploring all the potential options to ensure the quality of the research activities in Mozambique, the management team made the decision to hire a full time local CRA and a senior CRA to join the team. Taking into account the current situation of the COVID-19 pandemic, this decision was the option that better suits to the needs of the project and to the political situation of the country.

Sincerely,

Denise Naniche

ISGlobal Principal Investigator for ANTICOV
